

Project Tender

Project: Project STORM
Client: Linda Marshall

Team: Team Name
Renaldo van Dyk (12204359)
Johann Dian Marx (12105202)
Sean Thomas Hill (12221458)
Andreas du Preez (12207871)
Shaun Meintjes (13310896)
Department of Computer Science, University of Pretoria

Date: May 2015

1 The Team

1. Renaldo van Dyk (12204359)

- Interests

I'm a lover of technology in general and fortunate enough to pertain to it's value. I love knowing that every page of code that I write will help improve someone in their day-to-day life. I mostly favour web and mobile app development and I'm also intrigued by security and privacy aspects of information technology.

- My technical strong points:

- Java

Java programming is one of my strong points and I have been using the java language extensively for 3 years.

- XML

XML have been used throughout the course of 4 years in my degree. We have learned how to use it in different environments and I have experimented with it in my own time by writing small android apps.

- Web Technologies

PHP, Javascript, HTML, JQuery, AJAX, XML are some of my well developed skills.

- Other Languages

Visual C#

C++

C

ASP.net

SQL

UML

- Past experience relevant to project

I have worked on small Android apps, experimenting with some functionality including Wi-Fi, GEO location, voice recording etc. in order to get familiar with the Android SDK. The core of Android development lies in Java and XML. I have studied these languages to a great extent. This will make it easier for me to implement the mobile application and mobile malware. I have worked with web technologies for 5 years, in my field of study and in the more corporate environment. This experience will be crucial in the development of the web server application.

- Non-technical strengths

I am a strong perfectionist, this means I will not attempt a project if I am not 100% sure that I will succeed. I am driven and always do my utmost best to reach deadlines. Some of my characteristics include:

Reliable
Leader
Precise
Hard Working
Passionate
Loyal

- What makes you want to do the project

I love working with mobile development and web development and this project has a mixture of both. The fact that I have to write a malware application to test the mobile application intrigues me. This project can be used in big corporate companies and can be used on my resume.

5. Shaun Meintjes (13310896)

- Interests
I have an interest in technology and new software that makes our daily lives easier and fun. I love to develop and create new things. I enjoy a challenge and then succeeding in the end. I enjoy web and mobile development, as well as writing systems for statistics and finances.
- Technical Skills

- **Java**
Java is the language I enjoy most. I have been using Java for the past 4 years.
- **XML**
I have used XML during my degree, and I have learned how to use it effectively.
- **Web Technologies**
PHP, Javascript, HTML, JQuery, AJAX, XML are some of the skills that I have acquired.
- **Other Languages**
Visual C#
C++
C
SQL
UML
Fortran
COBOL
Assembly
